Healthy eating

The University may want to share the app with students

We need a computer for creating the app/website

User could check off whenever they use a menu on the app so they can quickly visit for next use

User enters restaurant or selects from a drop-down box

Public menu helps to give students a way to obtain other healthy options

The University may want to share the app with staff

Code is necessary to create a visually-appealing app or site

The app could show recommended meals based on what the user has previously checked off

App or website lists out the menu for the chosen dining hall along with all of the ingredients and nutrition facts

College students

Users may want to share the app with their friends

Connection to the school dining halls is vital

UofSC may share the app with colleges who are having similar issues

Website or smartphone app

UofSC in particular

Users would need an easily accessible way to obtain these menus

Allowance to create the app/website from the board of the University is also necessary

Users could rate the food after so the app gives better suggestions

Visual menu for each dining location within the app

Good health coincides with good education

Anyone can sign into the app with their Carolina login information

Students/Faculty could work together on the code to create something specific to UofSC

The app could give feedback to the school as to which foods are most popular and which are least popular

The ingredients shown would allow students with allergies decide where to eat

Promotes students to use dining halls more often and try different foods

Users could share their favorite foods over text or social media

The team creating the app could receive feedback from students about what would be most fitting for the campus

People could earn small rewards such as an extra meal swipe for that week

Making the app user-friendly is a must

Students can make a quick and easy decision about where to eat

App could connect with Grubhub at the campus so orders can be taken with the app

Rewards could be given out through rating the food and choosing different options

There could be a button for students to quickly share food ideas with friends such as a "share link" button

Eating doesn't have to feel like a chore

There could be raffles for more meal swipes

Maps could be in the app to locate dining halls

Students can have fun with friends when trying out new foods

The app could list a secret menu that only people using the app can obtain

The time and days each dining hall is open can be listed on the app
